

PORTFOLIO

Hello, I'm

Rian Oscar Jonathan

Unity Developer.

ABOUT ME

As a Unity Developer with a passion for interactive app and game development, I have been creating immersive experiences for desktop, mobile, and VR platforms since 2018. Based in Jakarta, Proficient in C# programming, game mechanics, and optimization. Successfully shipped multiple game projects,

Continuously innovating and finding ways to improve the quality of the apps I develop. Proven ability to work independently and collaborate effectively within a team.

WORKING EXPERIENCES

as a Unity Developer.

OmniVR

Jan 2018 – Mar 2019

Unictive

Apr 2019 – Jun 2020

Segaris Media Teknologi

Jul 2020 – Jul 2022

Shinta VR

Aug 2022 – Now

PROJECT PORTFOLIO

Shinta VR (2023-2024)

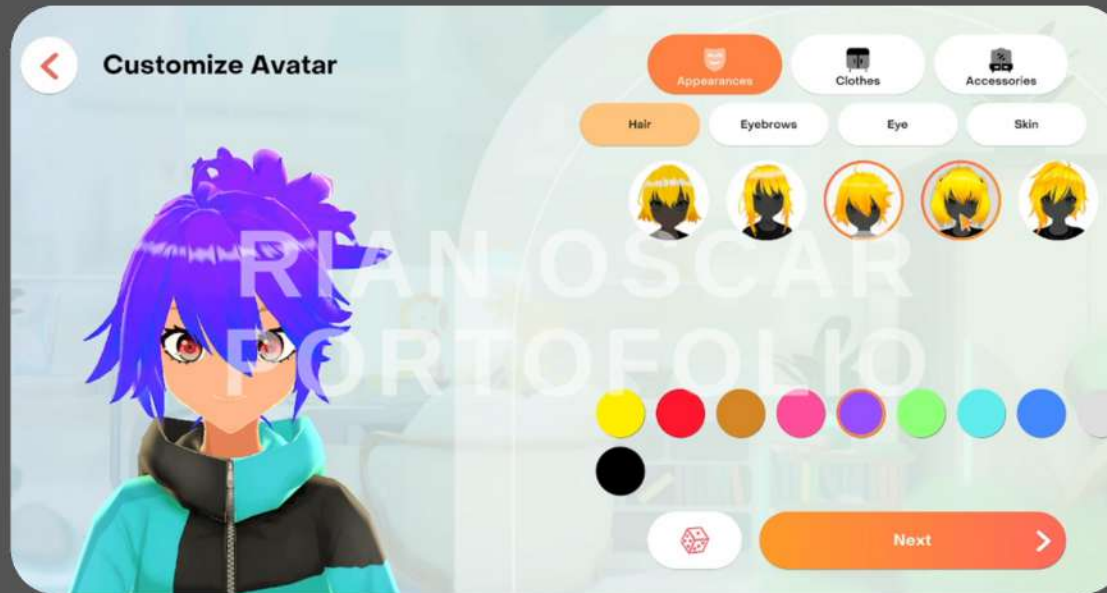

Cosmize

"Cosmize is a metaverse platform offering social interactions, avatar customization, and personalized room."

Platform : Web, Android & iOS

Feature :

- Multiplayer
- Multiplatform
- Integrate with Web3
- Customize avatar
- Customize Personal Room
- Chat & Microphone
- Friends
- Sharescreen
- Emoji & Dance Animation
- API Integration
- Asset Bundle
- etc

Shinta VR (2022-2023)

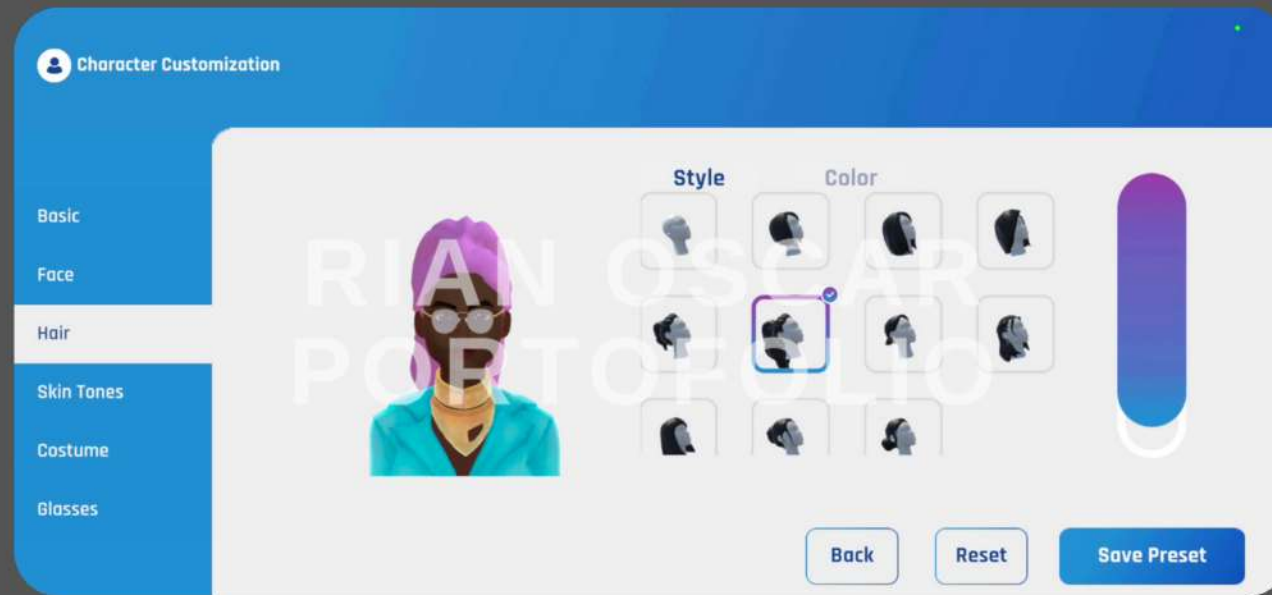

Ransverse

“Ransverse is an Open World metaverse platform offering social interactions, avatar customization, land customization.”

Platform : Desktop, Android & VR

Feature :

- Multiplayer
- Multiplatform
- Integrate with Web3
- Customize avatar
- Buy a Land
- Chat & Microphone
- Sharescreen
- Emoji & Dance Animation
- API Integration
- Asset Bundle
- etc

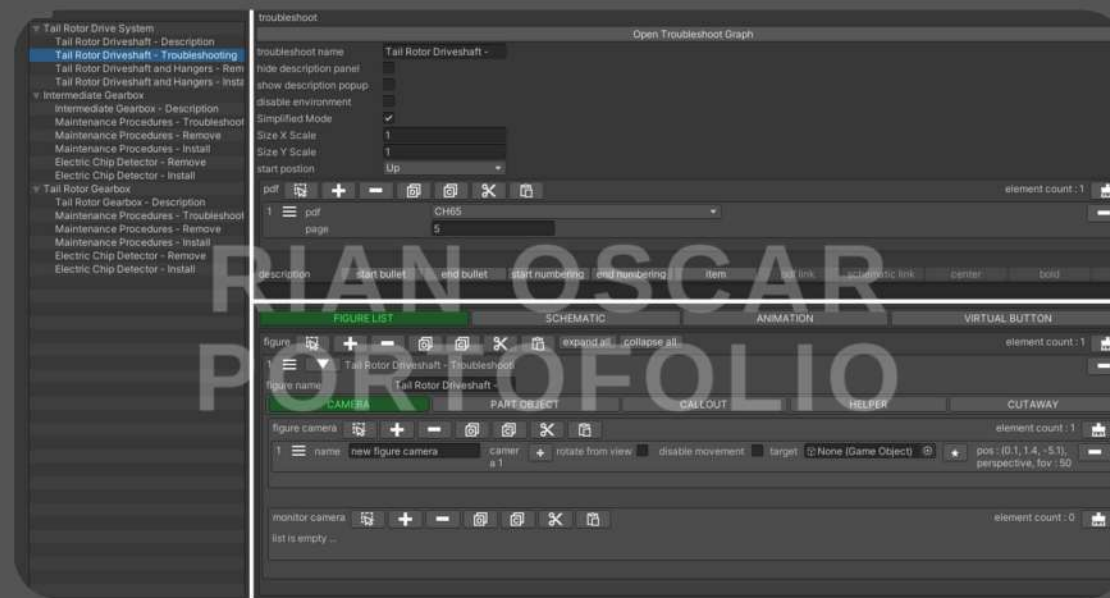

Virtual Machine Training Template

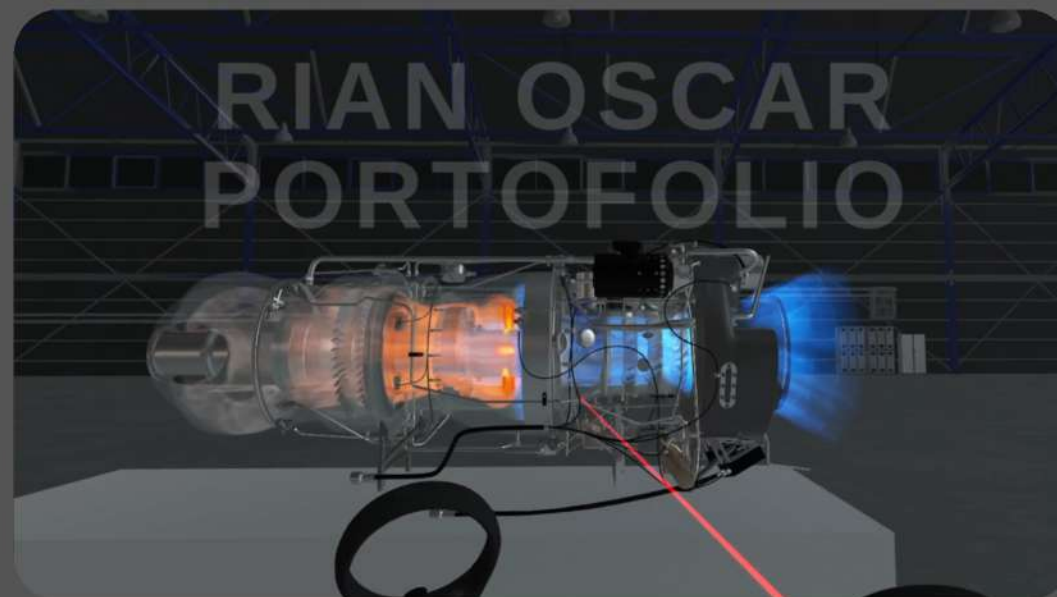

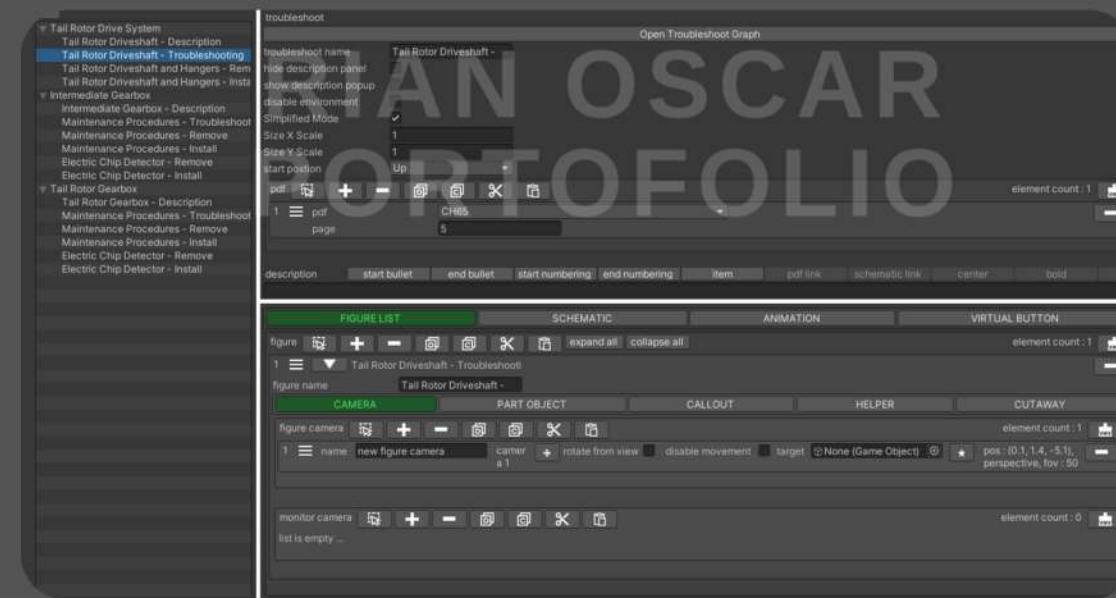

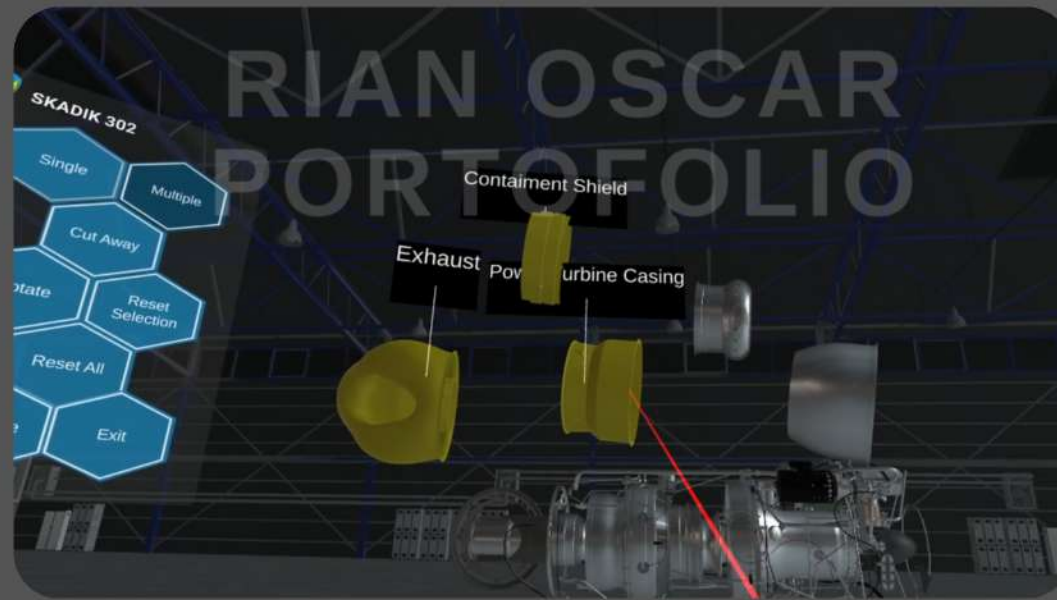

“A versatile application template designed for Desktop Platform to create engaging educational Application. The template includes features for delivering rich multimedia content, such as text, audio, images, and interactive 3D animations, as well as a free play mode for hands-on exploration.”

Platform : Desktop

Feature :

- Unity Editor Scripting
- Asset 3D Integration
- Animation Integration
- Virtual Button Simulation
- PDF Show
- Quiz
- Local Database
- etc

Virtual Machine Training Template VR

“A versatile application template designed for Desktop & VR Platform to create engaging educational experiences. The template includes features for delivering rich multimedia content, such as text, audio, images, and interactive 3D animations, as well as a free play mode for hands-on exploration.”

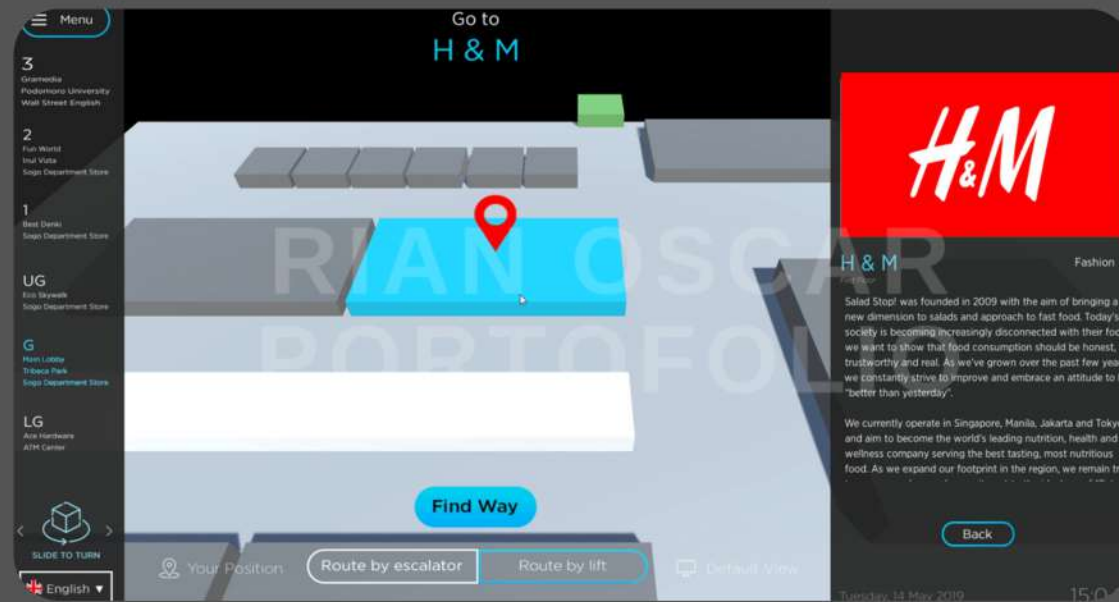

Platform : VR

Feature :

- Unity Editor Scripting
- Asset 3D Integration
- Animation Integration
- Virtual Button Simulation
- PDF Show
- Local Database
- etc

PROJECT PORTFOLIO

Unictive Media (2019)

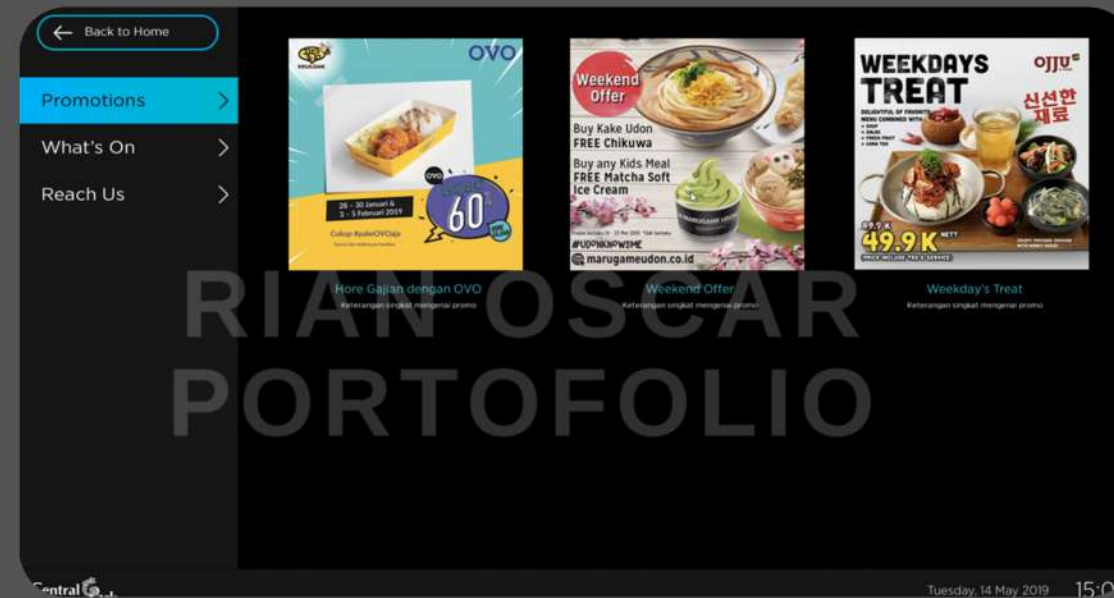

Astra Wayfinding

"An application that utilizes interactive 3D animations to guide users to their desired tenants & facilities. The app also displays advertisements for promotional vouchers or upcoming events."

Platform : Desktop

Feature :

- Pathfinding
- Touchscreen
- Asset 3D Integration
- Animation Integration
- Online & Local Database
- API Integration
- etc

Astra Kinect Photobooth

"An application for capturing photos with Kinect and touchscreen integration, featuring live background removal and interactive 2D animations."

Platform : Desktop

Feature :

- Kinect Integration
- Touchscreen
- Capture Photo
- Live Background Remover
- 2D Animation Integration
- Upload to internet
- QR Integration
- API Integration
- etc

Unictive Media (2019)

CNY Event using Kinect

“An immersive Kinect-powered game designed for Central Park Mall's Chinese New Year celebration. Players use their bodies to collect as many virtual coins as possible, competing against other players to achieve the highest score. A dynamic leaderboard displays real-time scores and rewards the top performers with exciting prizes.”

Platform : Desktop

Feature :

- Kinect Integration
- Touchscreen
- QR Scan
- 2D Animation Integration
- Local Database
- etc

Unictive Media (2019)

Virtual Aquarium & Mini Games

"A captivating virtual aquarium application that transforms giant touchscreens into immersive underwater worlds. Users can explore vibrant coral reefs, encounter diverse marine creatures, and participate in interactive mini-games. The app also offers educational content, providing fascinating facts about ocean life in a fun and engaging way."

Platform : Desktop

Feature :

- Mini Games
- Touchscreen
- Interactive
- 3D & 2D Animation Integration
- etc

Unictive Media (2019)

Nescafe Instagram Filter

"A fun and engaging Instagram filter created for the Nescafe brand. The filter features a dynamic Nescafe logo that tracks the user's head movements and animated coffee wings that flutter playfully. This AR experience encourages users to share their creative content and connect with the Nescafe brand in a new and exciting way."

Platform : Mobile (Instagram)

Feature :

- Instagram Integration
- Head Tracking
- 2D Animation Integration
- Asset setup
- etc

OmniVR (2018)

PROJECT PORTFOLIO

Firefight VR Simulator

"An immersive VR training application designed to provide realistic simulations of fire emergencies. Users can experience and practice essential safety procedures, such as using fire extinguishers and evacuating buildings, all within a safe and controlled virtual environment."

Platform : VR

Feature :

- Animation Simulation
- 3D asset Integration
- VR Interaction
- Particle Effect
- etc

Zombike VR

"An innovative VR entertainment application designed to captivate event attendees. By connecting to real-life stationary bikes, the app offers an immersive virtual cycling experience. Users pedal real-life bicycles connected to a VR headset, allowing them to navigate a virtual city while shooting hordes of zombies."

Platform : VR

Feature :

- Real Bike Integration
- VR Interaction
- Animation Simulation
- Live Background Remover
- 2D Animation Integration
- Upload to internet
- QR Integration
- etc

OmniVR (2018)

PROJECT PORTFOLIO

Wiro Sableng VR Experience

"An immersive VR experience designed to promote the movie 'Wiro Sableng'. Users can step into the shoes of the legendary martial artist and practice iconic moves from the film. The app features realistic physics and motion tracking, allowing users to feel like they are truly mastering the art of Wiro Sableng."

Platform : VR

Feature :

- VR Interaction
- Vive Tracker Integration
- Live Background Remover
- 3D Animation Integration
- Particle Effect
- etc

Personal Projects (2019–2021)

PROJECT PORTFOLIO

Instagram Filters

"A collection of Instagram filters I created using Spark AR, featuring various effects such as color change, face detection, interactive elements, and mini-games."

Platform : Mobile (Instagram)

Feature :

- Instagram Integration
- Head Tracking
- 2D Animation Integration
- Interactive Interaction
- Mouth Tracking
- Color Filter
- etc

Personal Projects (2024)

PROJECT PORTFOLIO

Tiktok Filters

"I've created a variety of engaging TikTok filters using Effect House, including addictive tap-tap games, creative color combination challenges, randomizers for fun decisions, and thought-provoking 'this or that' questions. These filters have been used in over 30,000 TikTok videos, generating over 5.5 million views. Perfect for adding a playful touch to your content and sparking fun interactions with your audience."

Platform : Mobile (TikTok)

Feature :

- TikTok Integration
- Head Tracking
- 2D Animation Integration
- Interactive Interaction
- Games Interaction
- Color Combination
- etc

Research Projects

“These are various research projects aimed at learning different features or creating prototypes.”
